PERSONAL PROJECTS

Personal Portfolio

- It is my personal portfolio website.
- I build this app using **react js** library and all its specialities.
- There is a contact form which i connect it to **firebase**.
- check here:** <https://tausif-arif-portfolio.herokuapp.com/>.

Google Search Engine: a google search engine using google custom search API

- It is google search engine clone.
- Created using **react js** and **axios** library for fetching data.
- Note:** Currently Working on this.
- check here:** <https://my-google-search.herokuapp.com/>.

weather 1.0: Weather app using Open Weather api in react js

- Live temperature of all cities in the world.
- There is also sunrise, sunset, humidity and wind info for that city.
- In future i will add 7 days future forecast and lots of weather related info which people need in daily basis.
- check here:** <https://reactweatherinfoapp.herokuapp.com/>.

Clicks: Unsplash Clone using Unsplash api

- It is a simple gallery website where we search any kind of images.
- check here:** <https://clicks-gallery.herokuapp.com/>.
